5754 Aluminum Tread Checkered Plate Sheet

The main alloying element of <u>5754 aluminum</u> <u>tread checkered plate sheet</u> is magnesium, and the magnesium content is between 3% and 5% It can be used in occasions with high strength and high corrosion resistance. 5754 aluminum tread checkered plate sheet has excellent corrosion resistance, especially for seawater and industrially polluted atmospheres. Its strength is higher than 5251. This high strength makes 5754 ideal for flooring applications. The

thinnest thickness of the patterned bottom plate can be 0.9mm, and the height of the pattern is about 0.6mm. The width of the patterned aluminum plate is usually 1250*2500mm and 1500*3000mm. We can customize production according to customer requirements.

Alloy	1 Series	1060,1100	
	3 Series 3003,3105		
	5 Series	5005,5052,5251,5154,5454,5754,5083,5086

Features

1. Strong weldability, low tendency of welding cracks, high strength of weld and base metal.

2. It's a medium-high strength aluminum alloy with good fatigue performance and corrosion resistance.

3. The surface quality is good, without oil spots, waves, scratches, roll marks, and the trimming is neat and burr-free.

4. 5754 aluminum plate products of different thicknesses and shapes can be customized according to customer needs.

Application

5754 aluminum tread checkered plate sheet is widely used in transportation, construction, decoration, floor around equipment, machinery, shipbuilding and other fields, air conditioners, carriages, platforms, packaging pipes, screen frames, various suspension beams, table legs, decorative strips, handles, wiring troughs and covers, chair tubes, etc.

The above mentioned aluminum product is produced according to national standard specifications. Please contact us for a free quote!
